Thus a "stone cancer" (known to scientific people as exercitus) is thought to be very different from a "rose cancer" (malitury or enoplatical growth). They differ only in the proportion of frame work to cells. The hard cancer is like a honeycomb, with double thick walls to the honey cells, while the soft cancer his an excessive amount of cells, with very thin frame work. SECLECTED CALIFORNIA.

When Cleveland was elected the democratic party of California got the notion that it was "In the anddle," and a very large proportion of its membership made up its mind to rike. Such a clamor for office there was not from any other state. Democratic committees, democratic hosses, democrats in half dozens, in pairs and slag's, proceeded to Washington before Chevelan I had gotten the sent warm, to "ne" shope. The president was besieged with suggestions, domands, appeals and lineats till, to get a little quiet, he assured everyhealy that things would be fixed as they desired after a little while, and so sent them off home empty-handed but hope-. Each refurning pilgrim felt that he in parmilar was in high favors. The state committee understood that it was to be the dispenser of patrenage; Boss Buckley gave out that the prosafranged with him for the parceling out of the spoils; many private individuals hinted that Geveland had asked their counsel as to the future, and each one felt sure that he, at least was going to get a "fat tiding."

A good many things have been "fixed," but in a war that anybody expected. Not a single man who was arged by the party, state organization, or by any considerable number of vate democrats, has been appointed to office. lot even has thris Buckley been able to deliver the goods he largained away upon the authority of his presidential commission. Every sug-gestion has been slighted; every demand treated with confenpt; every appeal neglected and every threat scorned. The "old line," the "one work" element and the "sising hope" of the party have all been passed over and fat ollices have been fistributed among people scarcely ever heard of before. Eastern influence has prevailed over home influence in every instance

where there has been a contest.

But the chief grievance was the appointment of the Chinese mission of an Indiana man cholly ignorant of the "Chinese operation" as it is understood in California, and whose views even on the main question of Chinese immigra-tion are not known. This, after all the promises made during the past ten years by the democratic inanagers, is a severe blow. It shows the voting bose in Cufficient that the demo-cratic party is not what it has always claimed to be, the unquestioning and uncompromising enemy of the Chinese.

The democratic party in California is largely composed of southern-born men and is wholly southern in ideas and spirit. These repeated slights are engendering just such feeling of baired as they would in South Carolina. The managers are mad—very used. They have kept the faith through many hopeless years; they fought the losing light over and over again ind now they have their reward—neglect and

COEN, HOGS AND CORN.

Replying to a remark made by Governor Woods at the banquet given to the Iowans in this city last Saturday night a correspondent In THE OREMAN PART (STATE OF A STATE OF A STATE OF A our distinguished visitors that we had the soil and climate for all kinds of agricultural pur-poses and products, and the only thing we needed was some of their emergetic and experie unit on the head, and unless we do get such n due lluie we can never passince pork enough or home consump ion."

The assumption that corn is necessary to the roduction of pork is a great mistake. The owans, themselves, who talked about the matter here, said it ivas not. They said we didn't need corn at all. Blind staggers among hogs, so feeding on much corn; and other diseases are traced to the same cause. The farmers of England fatten their bogs on post, find it profitable to do so, and get excellent pork. Then, if we aut cereais, have we not wheat and barley

Of our hogs, the lowens said they were a disgrace to us. They had seen no such long, lank, lean, scrubby and worthless unlass except in the southern states; for fifteen years, and if the like should let seen on an lowa furn the fact, would be taken for notice that the sheriff would probably be the next visitor. NGLISH POAITICS.

Political parties in logical are in a slogular attitude. The literals, budgered long by the conservatives and by the odds and onds of opposition cabais, have been more anxious to ay none at marginary than this pair. power down than their naversaries have been to take it up; while the conservations, after having eagerly accepted the help of the freighter co-ments of opposition to exerthrow the liberal government, have been most unwiding to take the government themselves unless the liberals would give bonds not to make similar combinations with the radicals and others against the

new government.

But Salisbury has at last taken the seals and is ran consoury has at less taken to seals and is trying to put the new government on its feat. Amazed at the extent and variety of the breconcilabilities in the late "opposition" by which has concatene was attorted, he family admits that he can govern only by the help of the great-painted followers of Chadstone, to whom he appears make them to the family of the greats making the painted followers of Chadstone, to whom he appears make them. peaks, arging them to take a stand above parli-suship and revenge. The offer of an earloan was the measure of the queen's judgment of Mr. tolidstone's immense and manproachable oppulatily and strength, and not of her kindly feelings, for the queen has long felt that lu-tween her aid the man whose power is visibly so independent of roys, favor these came of the friendship of favor. margarine clause of our dairy law needs no great attention, for there can ecardely be any profit in selling the hogus etoff no long as the genuite article can be bought for twenty-ive cents por pound, certainly not enough to pay for the risk in violating the law. In this icospect the market protects itself. The daily commissioner is making an effort to enforce the pravisions respecting the care and housing of mileh cows. He is extending his inquiries in allidirect ons, and wherever he finds that rows are ill-cared for in a way to affect the quality of their milk, he causes an immediate reform, or else be causes the arrest of the owners. When their attention is called to the matter farmers are estably dults willing to make improvements. The average peor quality of Oregon made butter in the past has been a matural consequence of the fact that dairying has been an uninoportant feature in a general farming business. Very few indeed have made a specialty of it. There has been a great advance during the past three years, and we believe that in three years more in state in the union will produce better grades of butter and cheese than our own.

He was rept ited as "a man calling himself H n P St John, from Johnson county who spen is his time sitting on a store-hox in front of the fett house, executing the truchery of Pomero, and culogiving York, saving. The time is past for men to be bought and sold in kansas.

It is a pity his mind should have so changed by the fail of 1834. He is one of those phono-menal characters who obtain sudden eminen a because of former obscurity. Nothing is kn. wn. against him, and, being the available on pro-mise randidate, be is suddenly elevated into place. His election for governor the first time was a surprise. The person who is no your governor was premature in his ambition.

Georgé T Anthony was a brave intelligent governor, whom the people desired should have a second term. When the republican convention met at Topeka it was found that John A Martin had a good following worked up by the new gapers. Martin had been a great benefit to the city of Atchison in particular, and to me state of hameas in general, in ably editing the Atchison Champaon for over twenty five pears. He had also been a galant soldier during the late war, and with this record to back him he could well have afforded to bide his time. He up a respectable following, yet not enough to

His plan was to supersede Senator 5 hn ! Ingalis. It is not lakely this could have been done had be had the United States treasury at his command. Mr Ingalis has mere oven the choice of the politicians his strength is with the common people—tate in Kansas rives to the dignity of a passion it is that which senate in the senate who have heard men say. I would be for ingalis in he were my most bitter snemy, because he is the brightest man we have and is an honor to the state. He was put office arternally by the committee, who evidently and not approxime thus as being so dangerous as he afterwarts proved Rule or rum now became his sam. The world kni was how he helped out a farty in p war which had always of posed "temperance patricism, the advancement of the race"—the three watchwords he had used to make himself the apostle of prohibition. The people of Kansas do not care whether he tigot money from the democratis or not. He has been rived at the bar of public opinion as a traitor to the principles he had professed, to the party which had diffed him from an obscurity which would how be as welcome as it was profound. He has been condemned. The decision is final—there can be no appeal. The sentence was social estructum as a positical dath. So far as this state is concerned, the judgment has been executed. Benedic Arnold could scarcely have been a more lonely man. Atchison Letter in Pittsburg form raile kar St. John! Not the evangelist, nor settle fire list, but St. John, the traitor to the republican party, to the state which honored him, to the temperance people who revered him.

The first that we of northern haneas ever heard of St. John was every

beard of %t John was after the election of a United States senator twelve years ago. He was reported as 'a man calling himself John ye St John, from Johnson coultry, who spends he time sitting on a store-box in front of the Feft bouse, executing the treachery of Pomerds and eulogizing York, saving "The time is past for men to be bought and sold in kaneas". It is a puty his mind should have so changed by the fall of 1884. He is one of those pheno

George T Anthony was a brave intelligent
governor, whom the people desired should have
a second term When the republican convention met at Topeka it was found that John A Martin had a good following worked up by the newspapers. Martin had been a great benefit to the city of Atchison in particular, and to the state of kansas in general, in ably editing the Atchinson Champion for over twent; five years He had also been a gallant soldier during the late war, and with this record to back him he could well have afforded to bide his time. Being a popular editor, he had only to let it be known that he was a candidate, when every editor in the state shouted for him, and worked up a respectable following, yet not enough to

in which it is suspended in the form of impute ril globules. After standing for some hours, these globules rise to the surface, forming a lay-r of cream, which, besides the fut, contains a quantity of casem and some senum, and when churned these oil glot ules break up, and unit ling form a fatty mass, which invariably contains a small quantity of the casem and water of the milk. Sait is generally idded during the process.

The constituents of butter, therefore, are fat-casen or curd, and sait.

The fat of butter consists of a mixture of the glycerides of the fully acids-palantic, stearle, and obeic acids. Moreover, as a characteristic feature, it contains butyric in combination with gitcorine, of which I shall speak farther on but o obtain an insight into the constitution of butter fat it is necessary to pay some attention to the physical and chemical properties of its proximate constituents.

to the physical and chemical properties of its proximate constituents.

Palmitin is a white solid, fusing at a deg 4, and crystalizing. It is insoluble in water and cold alcohol, but soluble in hot alcohol and ether. It occurs in nearly all fats.

Stearin resembles pulnitin in appearance, but fuses at 35 deg 4, and is less solid le in alcohol and ether. It occurs in most all fats in the largest proportion in those having a high fusing point.

committee is of the opinion that the proposition of Mr Morey is a very desirable one for the city to accept.

Your committee further report that, after a comparison with the published rates of the Portland Water company, we find the rates for furnishing waser to private individuals does not exceed one hat the rates of the Portland Water company, and your committee is of the opinion that by the passage of the ortinance and the construction of water works thereander, the rates for furnishing water to the inhabitants of Porland will, by the inevitable competition resulting therefrom, reduce rates far below the schedule in said ordinance. Your committee recommend that the title of said ordinance authorizing and directing a contract with P F Merray, and to provide furthelesy of special taxes therefor, and granting the privile ge, franchise and right of way through the privile ge, franchise and right of way through the streets of the city of Portland, for the purpose of conducting water through and throughout the city and for the purpose of furnishing the city of Portland and the residents with water. That section 7 be amended so as to read "Sec. 7 Said P F Morey, his associates and assigns shall have said water works fully completed by December 31, 1877, and begin supplying water for the foregoing purposes and the residents and inhabitants of the city of Portland by the Sist day of December 1881. But in taxe the completion of said water works shall be delayed by insulations and other ogal proceedings, shall extend the time so taken up and occupied by such injunctions and other ogal proceedings, shall extend the time for the completion of such works for a life period beyond said December 31, 1877.
